

PVC Floor Lamination 180μ (R9) - TAG Digital®

TECHNICAL DATA SHEET

Description:

The **PVC Floor Lamination 180μ (R9) - TAG Digital®** is designed to protect printed adhesive vinyl flooring.

Characteristics:

The **PVC Floor Lamination 180μ (R9) - TAG Digital®** is composed of a 180μ structured transparent Monomer PVC film, a permanent transparent adhesive and a 100 gr/m² paper liner.

Durability:

The maximum recommended duration of use is 1 year.

Storage:

1 year between 15 and 25°C and 45 to 55% humidity in the original box.

Classification :

The **PVC Floor Lamination 180μ (R9) - TAG Digital®** has an anti-slip classification R9.

Note:

The information in this data sheet is based on laboratory tests and experience gained in practice. It does not constitute a legal guarantee. A test prior to use must be carried out.

Durability is estimated based on exposure conditions in Central Europe. The actual life of the product depends on substrate preparation, exposure conditions and maintenance of the marking. Outdoor performance degradation can be expected when the films are exposed southward, if applied in areas with high temperatures such as Southern European countries, or in polluted areas.
